Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 11/12/06

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 17-28 are rejected under 35 U.S.C. 102(b) as being anticipated by Checkovich, US Patent 5,592,780. A cup 57 for causing a compressive friction check mechanism 26 to engage and disengage, the check being utilized to hold the linear biasing forces of a reciprocating device and an object attached thereto, being a door closer comprising at least one rod 24 which linearly reciprocates from within a body housing a biasing means, said rod loosely mounted with said check through an aperture housed within a structure comprising opposed friction points compressively engage the extended rod; said check further providing a trigger to lever said check (all as conventional in the art), the cup comprising a magnetic means 43 adapted to said check, and projections with a land and lock, as claimed. The device functions as claimed. The claimed method is inherent to the design.

Response to Arguments

3. Applicant's arguments filed 7/22/06 have been fully considered but they are not persuasive.

Applicant argues his invention has only two main elements: a magnet and projected surfaces; and that no other elements are required, thus making his device much more simpler and straight forward than the device of the applied art.

However, applicant's claims are so board that the device of Checkovich anticipates each of these positively claimed elements. The term "comprising" is open ended, and means that the scope of the claim language is not limited to just the language provided. If applicant were to use the term "consisting", being that it is a closed ended term, the scope of applicant's claims would be limited to that language that is positively claimed.

Conclusion

4. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the

advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
